

COMPLAIN MANAGEMENT MODULE (HELP DESK)

1. Purpose & Vision

The **Complaint Management (Help Desk) Module** enables any community member, staff, or authorized third-party vendor to **log issues, track progress, ensure accountability**, and **guarantee timely resolution** with **automated escalation** and **transparent reporting**.

This module acts as the **operational backbone** for community service quality.

2. Who Can Raise Complaints (Universal Access Model)

Primary Users

- Residents / Members
- Office Bearers (President, Secretary, Treasurer)
- Management Office Staff
- Mosque / Madrasah Admin (if applicable)
- Mall / Facility Visitors (controlled access)
- Contractors & Vendors (limited scope)

Secondary / Oversight Users

- Department Heads
 - Facility Managers
 - Community Administrators
 - Auditors / Inspectors (read-only)
 - Super Admin (system-wide)
-

3. Complaint Types & Classification Engine

A. Complaint Categories (Configurable)

- Maintenance (Electrical, Plumbing, HVAC)
- Security & Safety
- Cleanliness & Hygiene
- Parking Issues

- Water / Gas / Power
- Noise / Nuisance
- Staff Misconduct
- Vendor Issues
- Financial / Billing
- Facility Damage
- IT / Digital Services
- Suggestions / Feedback
- Emergency Complaints (High Priority)

B. Sub-Categories

Example:

- Maintenance → Electrical → Street Lights
- Security → Access Control → Unauthorized Entry

(Admin can **add** / **edit** / **disable** categories)

4. Complaint Registration (Smart Intake System)

Multiple Channels

- Mobile App
- Web Portal
- Kiosk (Optional)
- Admin Manual Entry
- QR-based Complaint Submission (Location-aware)

Complaint Form Fields

- Complaint Title
- Detailed Description (Rich Text)
- Category & Sub-Category
- Priority (Auto + Manual Override)
- Location (Tower, Floor, Unit, Area)
- Attachments:
 - Images
 - Videos
 - Voice Notes
 - Documents (PDF, DOC)
- Preferred Contact Method
- Emergency Flag (Yes/No)

AI-Assisted Enhancements (Optional)

- Auto-suggest category from text
 - Duplicate complaint detection
 - Severity prediction
-

5. Complaint Lifecycle & Status Flow

Standard Workflow

1. New
2. Acknowledged
3. Assigned
4. In Progress
5. On Hold (with reason)
6. Resolved
7. Closed
8. Reopened (if not satisfied)
9. Escalated (parallel state)

Each status change is:

- Time-stamped
 - Logged
 - Visible to the complainant
-

6. Assignment & Workforce Management

Assignment Modes

- Manual Assignment
- Auto-Assignment (Rule Based)
 - Category → Department
 - Location → Staff
 - Workload balancing
- Vendor Assignment (if outsourced)

Staff Roster Integration

- Working hours
- Off-days

- Skill mapping
 - Emergency duty staff
-

7. SLA & Escalation Matrix (Critical Feature)

SLA Definition

- Category-wise SLA
- Priority-based SLA
- Emergency override SLAs

Escalation Levels

- Level 1: Assigned Staff
- Level 2: Supervisor
- Level 3: Department Head
- Level 4: Community Admin
- Level 5: Governing Body

Auto Escalation Triggers

- No acknowledgment
- SLA breach
- Repeated reopening
- High-risk complaint

Escalation via:

- App Notification
 - Email
 - SMS
 - WhatsApp (Optional)
-

8. Resolution Management

Resolution Capture

- Resolution Notes (mandatory)
- Before / After Images
- Cost Incurred (optional)
- Vendor Invoice Upload

- Parts Used / Materials

Closure Controls

- Complainant confirmation
 - Auto-close after X days
 - Reopen window configurable
-

9. Feedback, Rating & Accountability

- Star Rating (1–5)
- Comment box
- Staff performance tagging
- Vendor performance impact
- Anonymous feedback option

Low ratings automatically flag:

- Supervisor review
 - Training needs
 - Vendor warnings
-

10. Advanced Dashboards & KPIs

Real-Time Dashboards

- Open vs Closed Complaints
- SLA Compliance %
- Average Closure Time
- Escalation Heatmap
- Department Performance

Reports (Exportable)

- Category-wise
- Tower / Block-wise
- Staff-wise
- Vendor-wise
- Time-based (Daily / Monthly / Annual)
- Defaulter Complaints (Repeated Issues)

11. Cost & Budget Tracking (Optional but Powerful)

- Complaint-wise cost
- Department budgets
- Vendor billing linkage
- Maintenance cost trends
- Capital vs Operational expense tagging

12. Communication & Notifications

- In-app chat per complaint
- Admin notes (internal only)
- Broadcast updates (linked with Digital Notice Board)
- Auto reminders
- Multi-language support

13. Audit Trail & Compliance

- Immutable activity logs
- User actions tracking
- SLA breach history
- Complaint deletion control
- Legal / inspection ready reports

14. Security & Access Control

- Role-based access
- Complaint visibility rules
- Sensitive complaint masking
- Data encryption
- GDPR-like consent controls (future-proof)

15. AI & Automation (Advanced Tier)

- Predictive issue hotspots
 - Preventive maintenance alerts
 - Auto-recommend solutions
 - Chatbot for complaint logging
 - Sentiment analysis on feedback
-

16. Integration Capabilities

- Facility Management Module
 - Project Management Module
 - Digital Notice Board
 - Accounting & Billing
 - IoT Sensors (Water, Power, Elevators)
 - CCTV snapshot linkage
-

17. Mobile-First UX Features

- One-tap complaint
 - Location auto-detect
 - Offline submission
 - Push notifications
 - Status timeline view
-

18. Why This Module Is STRONG

- ✓ Works for **ANY community type**
 - ✓ Scales from **small societies to mega organizations**
 - ✓ Ensures **transparency + accountability**
 - ✓ Reduces complaint resolution time
 - ✓ Improves community trust
-
