| Member     | Own      | Yes    | Limited | No     |
| Staff      | Assigned | No     | Status  | No     |
| Supervisor | Dept     | No     | Yes     | Yes    |
| Admin      | All      | Yes    | Yes     | Yes    |

---

## 5. Backend Notes

- Entity: `complaints`
  - Index on: `status`, `priority`, `SLA_deadline`
  - Role filter at API level
- 

## 6. QA Acceptance

- Correct complaint visibility per role
  - SLA timers accurate
  - Filters persistent
- 

# SCREEN 2: RAISE NEW COMPLAINT

## 1. Screen Overview

- **Purpose:** Intake of complaints
  - **Roles:** Member, Staff, Vendor
- 

## 2. UI Components

- Category → Subcategory dropdown
- Description (Rich Text)
- Priority selector
- Location picker (Auto + Manual)

- Attachments:
    - Images
    - Video
    - Voice note
  - Submit button
- 

### **3. Functional Behavior**

- Mandatory fields validated
  - CNIC / Member ID auto-linked
  - Complaint ID auto-generated
  - Auto-assignment triggered
- 

### **4. Automation**

- SLA assigned based on category
  - Department routing rule applied
  - Notification sent to assigned party
- 

### **5. Backend Notes**

- Entity: `complaint_attachments`
  - Storage: cloud (configurable)
  - Virus scan on uploads
- 

### **6. QA Acceptance**

- Cannot submit without required fields
  - Correct department assignment
  - Attachment upload limits enforced
-

# SCREEN 3: COMPLAINT DETAIL VIEW

## 1. Screen Overview

- **Purpose:** Full lifecycle tracking
  - **Roles:** All
- 

## 2. UI Components

- Complaint header (ID, Status, SLA)
  - Timeline view:
    - Created
    - Assigned
    - In Progress
    - Escalated
    - Resolved
  - Chat / Comments panel
  - Attachments gallery
  - Action buttons (role-based)
- 

## 3. Functional Behavior

- Real-time status updates
  - Internal vs public comments
  - File preview support
  - Escalation indicator
- 

## 4. Permissions

- Member: comment, reopen
  - Staff: update status
  - Admin: override, reassign
- 

## 5. Backend Notes

- Entity: `complaint_logs`
- Immutable audit trail

---

## 6. QA Acceptance

- Timeline accuracy
- Permission enforcement
- Comment visibility rules

---

# SCREEN 4: ASSIGNMENT & ESCALATION MANAGEMENT

## 1. Screen Overview

- **Purpose:** Control ownership & accountability
- **Roles:** Supervisor, Admin

---

## 2. UI Components

- Assignment dropdown (staff/vendor)
- SLA override (with reason)
- Escalation matrix view
- Manual escalate button

---

## 3. Functional Behavior

- Auto-escalation on SLA breach
- Escalation ladder enforced
- Notifications triggered

---

## 4. Backend Notes

- Entity: `escalation_rules`
  - Time-based cron jobs
-

## 5. QA Acceptance

- Escalation triggers correctly
  - SLA recalculation accurate
- 

# SCREEN 5: STAFF / VENDOR WORK PANEL

## 1. Screen Overview

- **Purpose:** Execution interface
  - **Roles:** Staff, Vendor
- 

## 2. UI Components

- Assigned tasks list
  - Status update dropdown
  - Work notes
  - Before/After upload
  - Mark Complete button
- 

## 3. Functional Behavior

- Cannot close without evidence (configurable)
  - Completion triggers member notification
- 

## 4. Backend Notes

- Performance metrics logged
- 

## 5. QA Acceptance

- Evidence enforcement
  - Status transition rules
-

## SCREEN 6: FEEDBACK & CLOSURE

### 1. Screen Overview

- **Purpose:** Quality control
  - **Roles:** Member
- 

### 2. UI Components

- Rating (1–5)
  - Feedback text
  - Reopen option
- 

### 3. Functional Behavior

- Low ratings flagged
  - Reopen creates new SLA cycle
- 

### 4. Backend Notes

- Entity: `complaint_feedback`
- 

### 5. QA Acceptance

- Rating captured
  - Reopen logic correct
- 

## SCREEN 7: REPORTS & ANALYTICS

### 1. Screen Overview

- **Purpose:** Governance & planning
- **Roles:** Admin, Committee, Super Admin

---

## 2. UI Components

- Charts:
  - Category trends
  - SLA compliance
  - Staff/vendor performance
- Export (PDF, Excel)

---

## 3. Functional Behavior

- Date & role filters
- Drill-down support

---

## 4. Backend Notes

- Pre-aggregated views recommended

---

## 5. QA Acceptance

- Data accuracy
- Export integrity

---

# SCREEN 8: CONFIGURATION (ADMIN)

## 1. Screen Overview

- **Purpose:** System setup
  - **Roles:** Admin, Super Admin
-

## **2. UI Components**

- Category management
  - SLA rules
  - Escalation matrix
  - Notification templates
- 

## **3. Functional Behavior**

- Changes versioned
  - Impact preview before save
- 

## **4. QA Acceptance**

- Rule enforcement system-wide
