

SCREEN-BY-SCREEN DEVELOPER SPECS

MEMBERSHIP & MEMBER MANAGEMENT MODULE

SCREEN 01 — MASTER USER SIGN-UP / LOGIN

Purpose

Create a **single global identity** usable across all communities.

Actors

- New User
- Existing User

UI Components

- Email / Mobile input
- Password
- OTP verification
- Social login (optional)
- CTA: Create Account / Login

Functional Behavior

- Check for duplicate email/mobile
- If exists → login flow
- If new → create **Master Member Profile**
- No community created yet

Backend Notes

- Table: `users`
 - Enforce unique constraints
 - Status: Active / Inactive
-

SCREEN 02 — MASTER MEMBER PROFILE (GLOBAL)

Purpose

Maintain **person-level data** shared across communities.

UI Components

- Profile photo
- Name
- CNIC / Passport (optional)
- Email (read-only if verified)
- Mobile
- Address
- Language preference
- Notification preferences

Functional Behavior

- Edit once → reflect everywhere
- Sensitive fields permission-controlled

Backend Notes

- Table: `users`
 - Do NOT store community-specific data here
-

SCREEN 03 — CREATE NEW COMMUNITY

Purpose

Allow any user to create a **new community of any type**.

UI Components

- Community name
- Community type selector
- Description
- Location
- Logo upload
- Create button

Functional Behavior

- Creator becomes **Super Admin**
- Default roles auto-created based on type

Backend Notes

- Tables: `communities`, `memberships`
 - Auto-create membership with role = Super Admin
-

SCREEN 04 — COMMUNITY SWITCHER (GLOBAL COMPONENT)

Purpose

Allow seamless switching between communities.

UI Components

- Dropdown / Drawer
- Community name
- Community icon
- Role badge

Functional Behavior

- Switching changes:
 - Menu
 - Permissions
 - Data scope
 - Notifications

Backend Notes

- Active community stored in session/token
-

SCREEN 05 — COMMUNITY MEMBER DASHBOARD (PERSON VIEW)

Purpose

Show **all communities** a user belongs to.

UI Components

- Community cards
- Role labels
- Status indicators
- Pending approvals

Functional Behavior

- Click → switch context
 - Clear role visibility
-

SCREEN 06 — JOIN COMMUNITY (MEMBER-INITIATED)

Purpose

Allow users to apply for membership.

UI Components

- Community search
- Membership type dropdown
- Community-specific fields
- Apply button

Functional Behavior

- Status = Pending
- Admin notified
- Auto-validation rules configurable

Backend Notes

- Table: memberships
 - Status lifecycle starts
-

SCREEN 07 — INVITE MEMBER (ADMIN)

Purpose

Allow admins to onboard users quickly.

UI Components

- Email / Mobile input
- Membership type
- Role assignment
- Send invite

Functional Behavior

- Existing user → link membership
 - New user → invite + profile creation
-

SCREEN 08 — MEMBERSHIP APPROVAL QUEUE

Purpose

Allow admins to approve or reject requests.

UI Components

- Pending list
- Member summary
- Approve / Reject buttons
- Remarks

Functional Behavior

- Approval activates membership
- Rejection logs reason

SCREEN 09 — COMMUNITY MEMBER DIRECTORY (ADMIN)

Purpose

Manage all members inside a community.

UI Components

- Search & filters
- Role, status, type filters
- Bulk actions

Functional Behavior

- Export list
- Role change
- Status change

SCREEN 10 — MEMBER PROFILE (COMMUNITY CONTEXT)

Purpose

Show **community-specific data** of a member.

UI Components

- Basic profile (read-only)
- Community metadata
- Roles
- Permissions summary
- Activity logs

Functional Behavior

- Same person → different data per community
-

SCREEN 11 — ROLE & PERMISSION MANAGEMENT

Purpose

Control access precisely per community.

UI Components

- Role list
- Permission matrix
- Save changes

Functional Behavior

- Role-based access enforced everywhere
- Changes applied instantly

Backend Notes

- Tables: `roles`, `permissions`, `membership_roles`
-

SCREEN 12 — MEMBERSHIP STATUS MANAGEMENT

Purpose

Control lifecycle of a membership.

Statuses

- Pending
- Active
- Suspended
- Expired
- Terminated

Functional Behavior

- Status change triggers notifications
 - History logged
-

SCREEN 13 — MEMBERSHIP HISTORY & AUDIT LOG

Purpose

Provide traceability and compliance.

UI Components

- Timeline view
- Actor, action, timestamp

Functional Behavior

- Read-only
 - Exportable
-

SCREEN 14 — LEAVE COMMUNITY (MEMBER)

Purpose

Allow clean exit without deleting account.

Functional Behavior

- Membership closed
 - Data retained for audit
 - User remains in other communities
-

SCREEN 15 — NOTIFICATION PREFERENCES (PER COMMUNITY)

Purpose

Avoid notification overload.

UI Components

- Toggle per module
- Per community controls
